Norcross, CA 30071

Dear Dr. Whiteman:

As you know for the past several months we have tested and evaluated the Zymo Bioremediation Aqueous Based Parts Washer System.

To date, the results have been outstanding. In our opinion, the cleaning effect of the water based solution was comparable to that of a solvent solution.

In a field test conducted by Wynn's it was found that the solution cleaner capabilities lasted significantly longer than typical solvent solutions. Technicians who used the system expressed their delight with the ability of the fluid to minimize their concerns with eye and skin irritation typically associated with solvent based systems.

As you know our company is committed to environmentally friendly products such as our Du-All Coolant Recycler, therefore, we are pleased with the results of our evaluation.

Yours truly,

WYNN OIL COMPANY

Gerry Miles  
Director of Sales
