To Whom It May Concern:

Over the past 5 months I have worked very closely with Dura-Chem in evaluating the Zymo aqueous based parts cleaning system. We have purchased 4 demo units and put them in two locations. The first location, is Camp Roberts up north, and the second location is Los Alamitos. We put two units at each place. Over the past couple of months we have been closely monitoring these units. We have found this product to be very effective in our daily parts washing operation as well as meeting our strict environmental standards.

We are currently issuing a purchase order for 6 more units to go into 6 more locations. In addition we have decided that this aqueous based unit will be what we install in every National Guard throughout California.

We highly recommend this unit and feel that aqueous based parts cleaning systems are definitely the wave of the future.

If you have any questions please feel free to give me a call at (916) 854-3691.

Sincerely,
