Dear Sir:

As a former Vice-President of Safety-Kleen, I am interested in new parts cleaning system technologies. I believe your water based biological based parts cleaner known as the ZYMO unit offers true waste minimization along with a lower cost than the present parts cleaner alternatives.

The benefits as I see them are as follows:

- Minimizes waste
- Eliminates the VOC issue
- Easier on an operators skin
- Lower operating cost

I believe your system is one that has the potential to be marketed widely as the next generation parts cleaning system. I wish you well in your business endeavors and if I may be of any assistance please feel free to contact me at your convenience.

Best regards,

Environmental Purchasing Associates
